What Drives You Batty?

_____ drives me batty!

Batty Labeling

Label the parts of the bat.

Bats, Bats

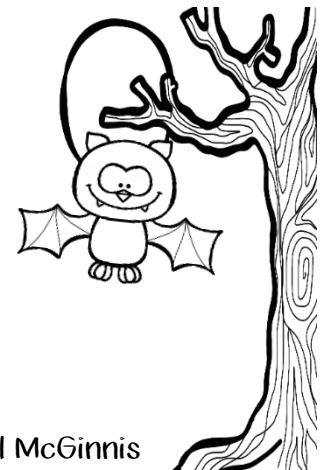

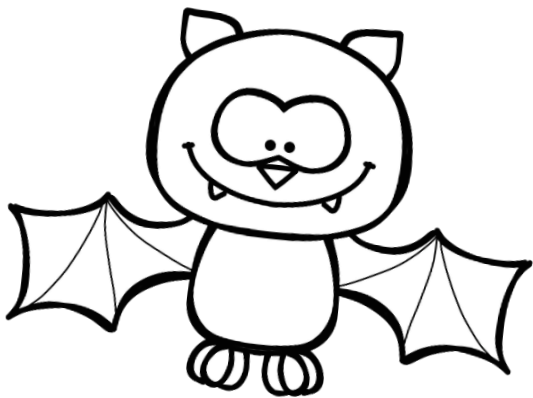

Bats, bats, come out at night.

They live in caves, and have two wings for flight.

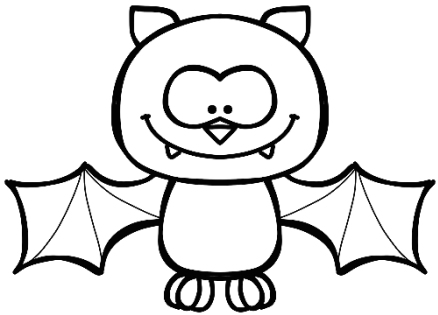

Some like to eat bugs, others like to eat fruit.

They hang upside down to sleep, now isn't that cute!

Bat Addition

Cut out the bats. Use the addition
mat to solve the problems.

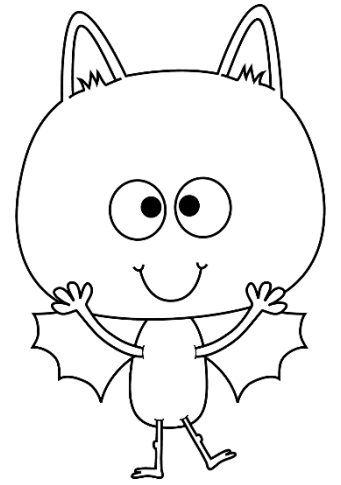

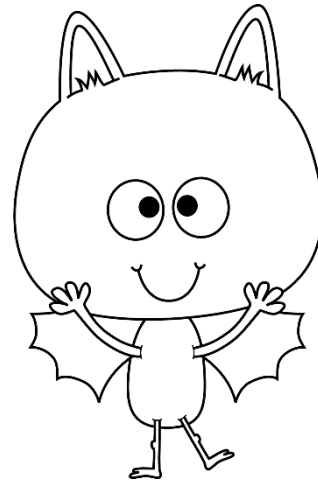

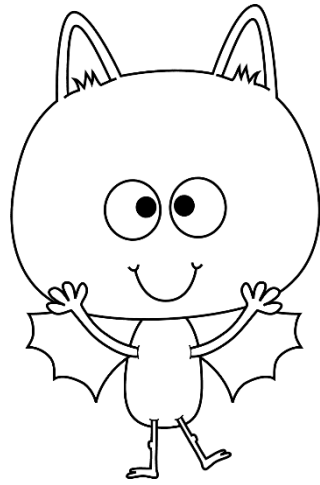

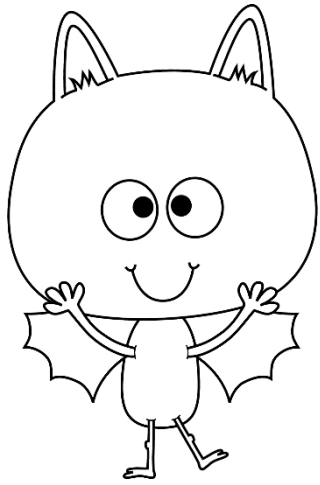

BAT CAVE CRAFT

This little craft shows how bats can hang upside down. All you need are cups and popsicle sticks. I cut out the front of the cup so that it looked like a cave. I found these cups at Wal-mart.

Students cut out the bat and the "bats hang upside down" tag. They glue the bat to one end of the popsicle stick and push the popsicle stick through a hole that is pre-cut in the bottom of the cup. Then they glue the "bats hang upside down" tag to the other end of the popsicle stick. Simple as that. They can now move the bat up and down in the cave.

If you are completing this activity with young students, you may want to have the cups pre-cut with the front "cave" opening already cut and the slit on top for the popsicle stick pre-cut.

Bat Cave Craft

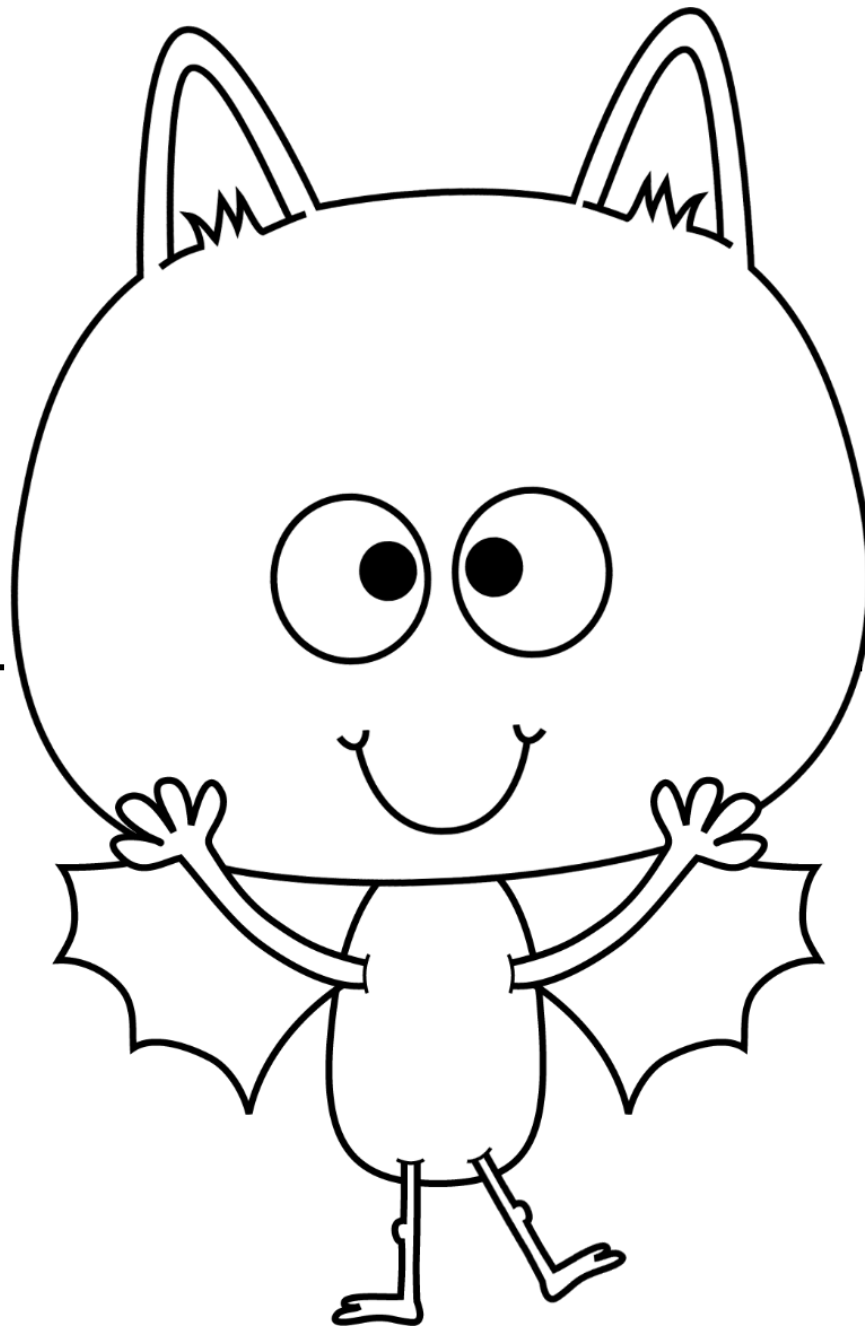

(students use these for their bat cave craft)

BAT HATS

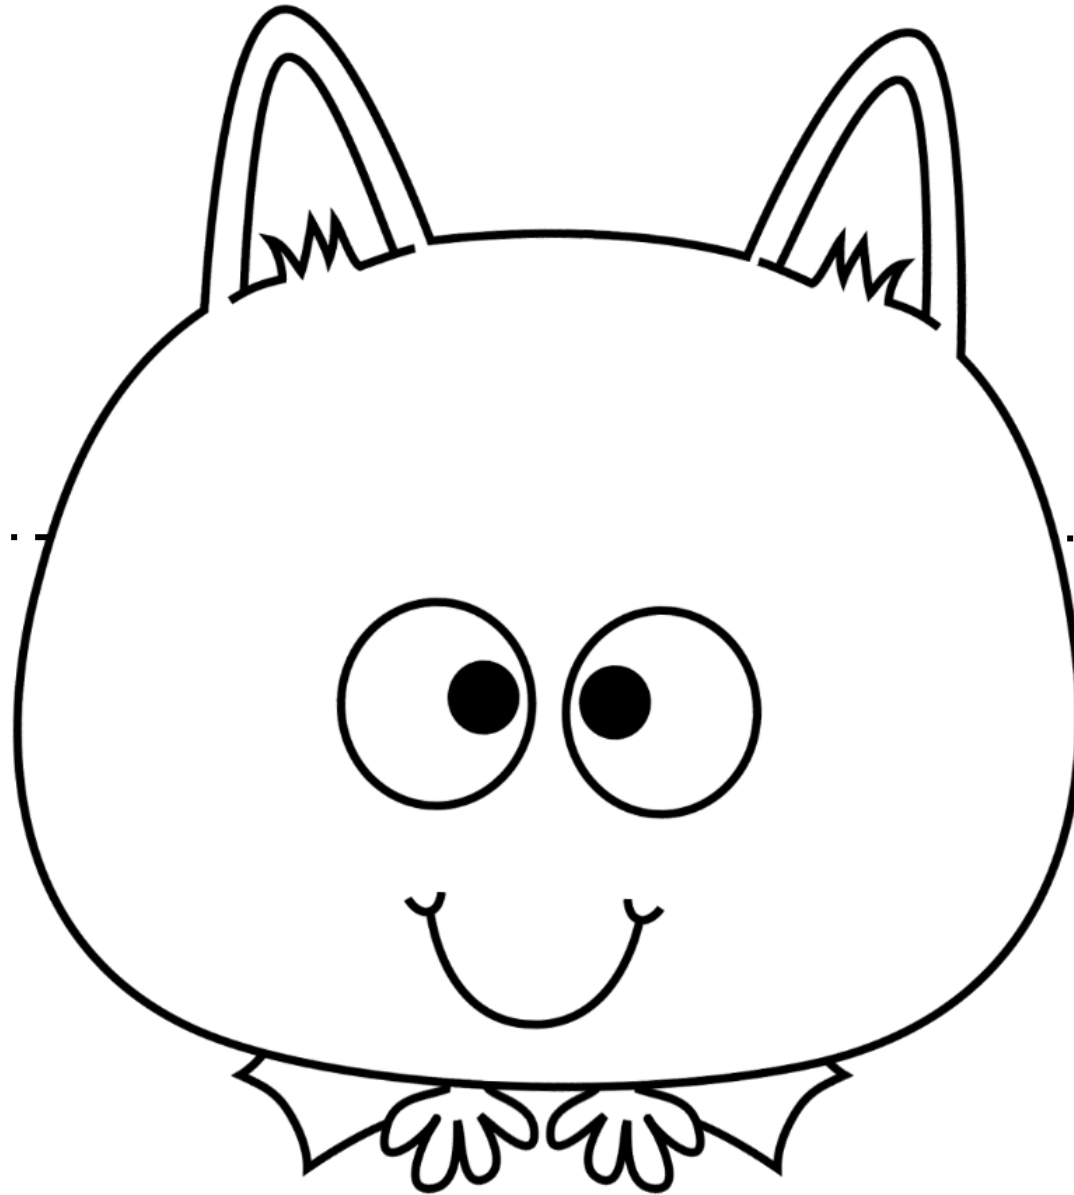

Students color the bat and then cut along the outside edge as shown. Attach the hat to a construction paper strap on the back. Measure the strap to each student's head. Staple!

Bat Hat (option 2)

Students cut along the dotted line and around the top of the bat's head. After completion, attach a construction paper strip of paper to the back to create a hat.

Bat Hat (option 1)

Students cut along the dotted line and around the top of the bat's head. After completion, attach a construction paper strip of paper to the back to create a hat.
