

# HOW TO PLAY FAMILY FEUD

## CHEAT SHEET

Choose one person to be the host and split your group into two teams. (The host is the only person who can see the answers)

### **How to Start**

First, the host reads a survey. One person from each team answers. The team whose leader gives the highest-scoring answer gets to decide if they want to take the survey or pass it to the other team.

### **Playing As a Team**

Next, each member of the playing team guesses an answer one at a time (in order). No discussion is allowed. If the answer is too vague, the host tells the contestant to be more specific. If an answer overlaps with an already given answer, the contestant guesses again.

Now, when an answer is incorrect, the team gets a strike.

- If the team gets all the answers right before earning three strikes, they get the total value of the points they guessed.
- If the team gets three strikes before guessing all of the answers, the other team has one chance to guess a remaining answer. If they guess correctly, they steal all of the points that the other team earned.

### **Other Fun Ways to Play Family Feud Questions**

Don't forget that you can customize at home or at school!

- No Teams: Don't feel like organizing the group? Just let everyone shout out the answers until you've guessed them all. Keep score or not!
- Pen and Paper: First, read all the questions in a row. Each player takes one guess at the question and writes it down. The player who guesses the highest score wins.
