# Bump Game

## Instructions

**Materials Needed:** Bump game board of choosing, 10 counters of one color and 10 counters of a different color, 2 dice

**Objective:** To be the first person to have all of his/her counters on the game board.

### Directions:

1. Each player takes 10 counters of the same color (i.e. one player has 10 red counters and one player has 10 blue counters).
2. Each player rolls a dice. Whoever has the highest roll goes first.
3. The first player rolls both dice. The player adds the numbers of both dice together (i.e. if the player rolled a 6 and a 4, the sum of both dice is 10), and finds that number in the chart. The player reads the sentence beside that number, determines the definition of the underlined word (context clues) or phrase (idioms), and covers the space with the corresponding answer with one of his/her counters.
  - If the space with the corresponding answer has already been covered by the other player, the player can bump the other player's counter off of the space and replace it with his/her own counter.
  - If the space with the corresponding answer has already been covered by his/her own counter, the player can place a second counter on top of it. When two of a player's counters are on top of the same space, that player's counters can no longer get bumped off by the other player. They are locked in.
  - If the space with the corresponding answer has already been locked in by either player, the player cannot do anything. He/she must wait for the next turn.
4. Play continues with each player taking turns until one player has placed all of his/her counters onto the game board. That player is the winner!
